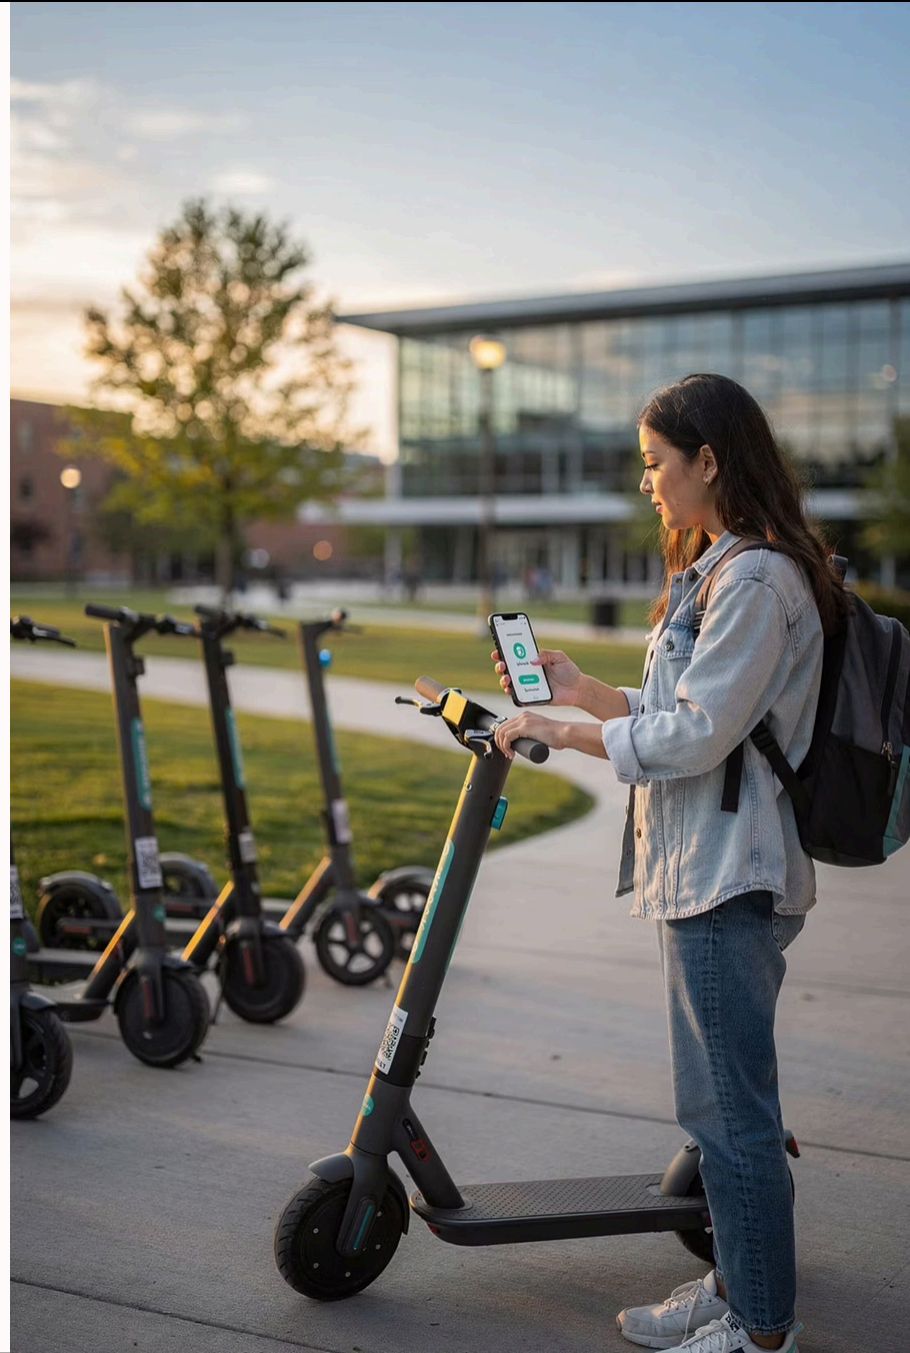
Electric campus mobility for India's universities

PRE-SEED · 2026



Did you know...

Students in India walk

15-40 MINUTES

between classes?

Every single day. Across campuses spanning 100-600 acres.

India's top private universities are the size of small towns — and students have no way to get around them.

That means...

Students arrive late and fatigued

Long walks to lectures every single day drain energy and punctuality.

Universities face chaos

Thousands of private bikes cause congestion, safety incidents, and an emissions crisis on campus.

No viable electric solution exists

No purpose-built, managed electric mobility solution exists for Indian campuses today.

40M

Students enrolled in Indian universities

1,100+

Universities across India

0

Purpose-built campus electric mobility solutions in India today

The right vehicle. The right environment. Fully managed.

Shared electric scooters work brilliantly when the conditions are right — controlled environment, captive users, no traffic chaos. Indian university campuses are the perfect conditions. That is exactly where Elmo operates.

2 km in 5 minutes

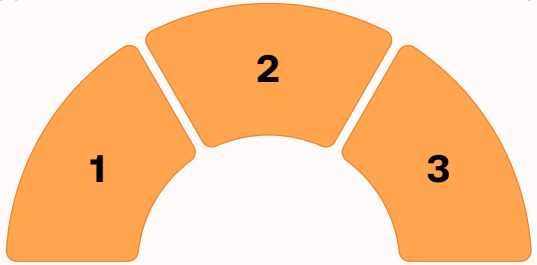
Every campus destination reachable in a single ride. 15–40 minute walks become 5 minute rides.

Campus-native by design

Not a city operator adapted for campuses. Built exclusively for controlled campus environments from day one. IoT connected, geofenced, GPS tracked.

Zero burden, exclusive contract

White-labelled, fully managed by Elmo. The university signs once and owns the relationship permanently — no competitor gets in.



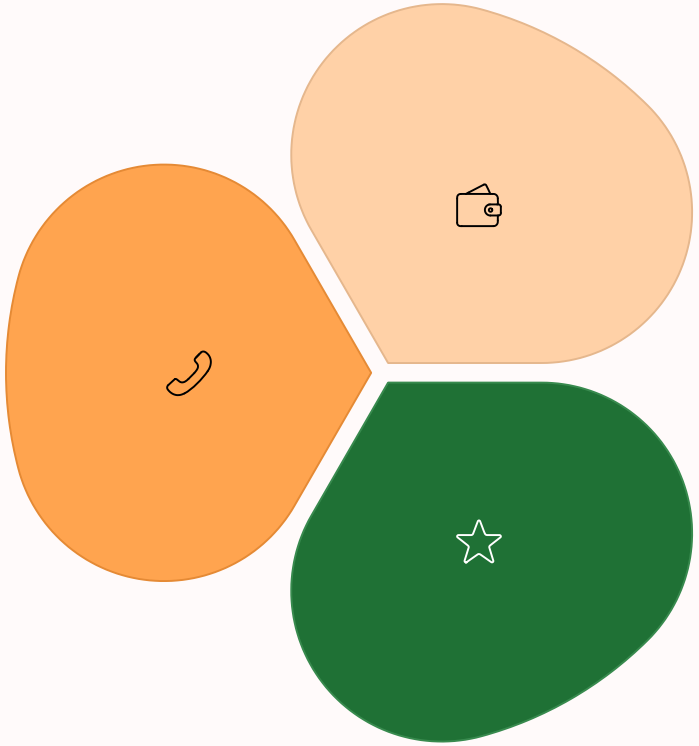
elmo

BUSINESS MODEL

LAUNCH MODEL

Pay-Per-Ride

₹6/min + ₹10 unlock. Students pay as they go. No cost to the university.



LAUNCH MODEL

Ride Pass

Weekly and monthly prepaid passes. Drives loyalty and repeat usage.

PREFERRED

Campus License

University pays a fixed monthly fee. Students ride free or subsidised.

Campus License is the end state — recurring, contracted, locked.

MARKET OPPORTUNITY

TAM — TOTAL ADDRESSABLE MARKET

40M+

Students enrolled across India's universities and colleges

1,400+

Universities and tech parks — total addressable campuses across India

€3.2B

Total annual campus mobility spend. 40M students × ₹600/month on autos, rickshaws and private transport. This is the wallet Elmo replaces.

SAM — SERVICEABLE ADDRESSABLE MARKET

24M+

Students at large private universities — residential, campus-native, daily commuters

500+

Private universities with large campuses plus established tech parks — fast decision-makers, no government procurement cycles

€69M

Elmo's direct operator revenue opportunity. 450 university campuses + 50 tech parks × 200 scooters steady state. Built entirely from Elmo's own unit economics.

5-year ARR target: €18M across 220 campuses and tech parks — under 1% of TAM, under 27% of SAM. Pre-seed already has 2 sites signed or in advanced discussions before the round closes.

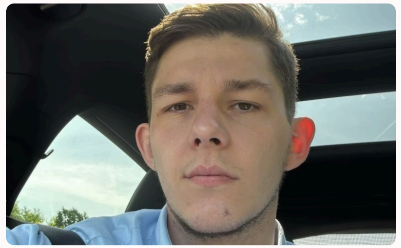
THE TEAM

CO-FOUNDER & CEO

Amrit Singh

Commercial · Product · Strategy

- Micromobility operations with Voi, Lime & Uber (UK & Sweden)
- Strong product and startup background
- Led the Mahindra University partnership



CO-FOUNDER & CTO

Jonas Behli

Technology · Infrastructure · Product

- Founded a micromobility company from scratch (Germany)
- Built proprietary app & backend infrastructure
- Deep hands-on EV tech experience

CO-FOUNDER & COO

Kiran Musunuru

India Operations · Logistics · Scale

- Extensive India-wide execution experience
- Multi-sector operations leadership
- Drives India deployment & campus relationships

CO-FOUNDER · BOARD · ADVISOR

Virpal Singh

Network · Fundraising · Mentorship

- Accomplished founder and CEO of DI Gasell company (+€40 million) & active investor
- Deep network in Indian business ecosystem
- Mentor and board-level strategic advisor

India execution + Nordic capital access + deep micromobility ops experience — **a team built specifically for this opportunity.**

THE ASK

€300,000

Pre-Seed 10-12 months · 3 campuses live · Seed trigger

Bucket	Amount	%
Fleet CAPEX — 3 × 50 scooters	€135k	45%
Campus operations	€24k	8%
Sales team	€24k	8%
Platform, SIMs & running costs	€39k	13%
India manufacturing development	€15k	5%
Contingency — 4th campus ready	€63k	21%

WHAT WE HIT WITH THIS RAISE:

- 3 campuses live
- B2B vs per-ride model validated
- Seed raise ready Q4 2026/Q1 2027
- 8-10 contracts signed
- €100k ARR target
- India-built vehicle development - Dynem
