THE CHALLENGE

Why Campus Mobility Matters

Lovely Professional University's sprawling campus presents a unique mobility challenge. Students lose valuable time every day simply getting from one place to another — and existing options aren't keeping up.

600

Acres

LPU is one of India's largest single campuses — getting across it takes time every day.

30K+

Students

Most rely on walking, autos or private vehicles to move around daily.

3×

Higher Adoption

Stand-up scooters achieve 3× higher daily rides than e-bikes — faster, more intuitive, built for short campus trips.

ABOUT ELMO

Who We Are

Elmo Mobility is a **campus-native electric scooter sharing company**, built from the ground up for Indian universities. We don't retrofit city solutions for campuses — we design exclusively for them.

Stand-Up E-Kick Scooters

Same category as Voi & Lime in Europe — proven globally, adapted for India.

Campus Exclusive

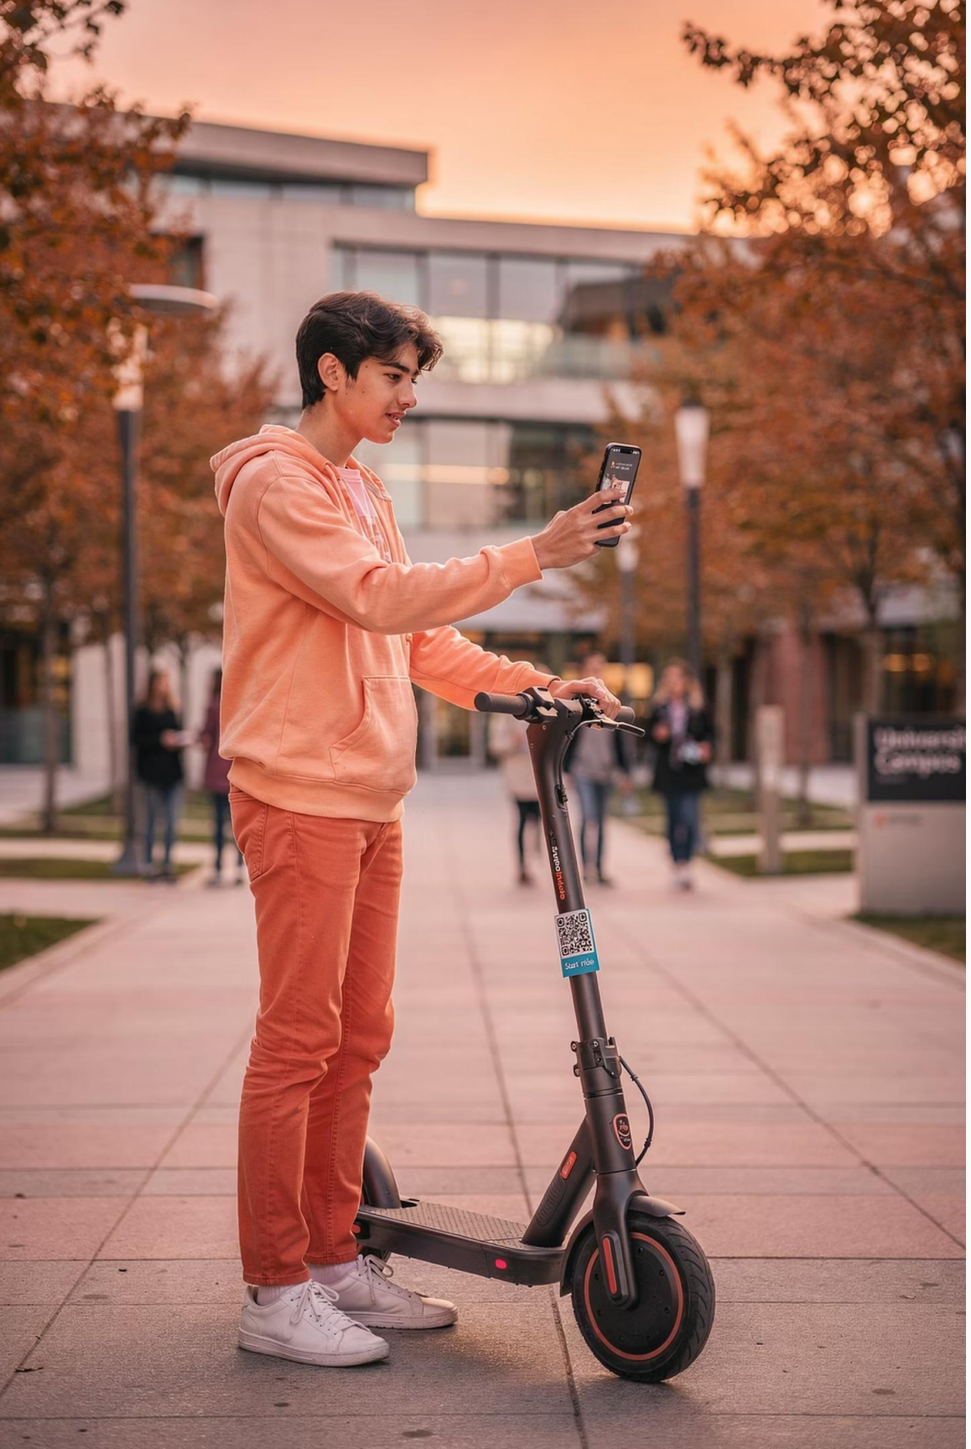
Built exclusively for private campus environments — not city streets.

Fully Managed

Battery swaps, maintenance & support all included. Zero burden on your team.

Signed Campus Partner

Mahindra University, Hyderabad — our first signed campus deployment.



elmo

HOW IT WORKS

Three Simple Steps to Campus Mobility

Elmo's system is designed for frictionless adoption — no charging infrastructure required, no complex onboarding, and no operational overhead for LPU.

01 — Swap Zones Placed Across Campus

Pick-up and drop-off points near hostels, canteens & key buildings. No charging infrastructure needed — our batteries are swapped, not charged.

02 — Students Scan & Ride Instantly

Open the Elmo app, scan the QR code. The ride starts in seconds. Return to any swap zone on campus when done.

03 — We Manage Everything Else

Battery swaps, maintenance, repairs & rebalancing — fully handled by our team, 7 days a week.

elmo

THE VEHICLE

Built for Campus. Not the City.

Designed for short trips — fast, safe, and smart. Every component is optimised for the unique demands of a campus environment: pedestrian-friendly speeds, all-weather durability, and IoT intelligence built into every ride.

25 km/h

Capped speed, safe for campus pedestrian zones

IoT Connected

Real-time telemetry, remote lock/unlock, live diagnostics

GPS Tracking

Live fleet visibility — every scooter, always on the map

Geofencing

No-go zones & no-parking areas enforced automatically

IP65 Rated

Suspension, lights, all-weather — built to last

QR Unlock

Scan & ride in seconds. No cards, no cash.

elmo

PARTNERSHIP MODELS

Two Ways to Partner

We offer flexible engagement models to suit LPU's priorities — whether you prefer a zero-cost approach or maximum control over the student experience.

Pay Per Ride

Students pay per minute via the app. **No cost to LPU.** Elmo manages all revenue and operations end-to-end.

Campus Licence ⭐ Preferred

LPU pays a fixed monthly fee and decides how much students pay. Cover the full cost for free rides or subsidise partially. **Maximum adoption, minimal friction.**

Fixed monthly fee · LPU sets student pricing · Simple & predictable

elmo

PILOT PLAN

A Pilot Built Around Your Campus

We've designed a phased pilot that minimises risk and maximises learning — scaling up only when demand proves itself on the ground.

1

50–100 Scooters

Start with 50, scale to 100 based on first-semester demand signals.

2

5–10 Swap Zones

Hostels, main gate, canteen, academic blocks, sports complex.

3

40–80 sqm Space

LPU provides one dedicated closed space for battery swap & maintenance ops.

4

1 App — Any Phone

QR scan to unlock. RFID cards (optional). No cash. Works on any smartphone.

5

90 Days to Launch

Fleet live within 90 days of MoU signing — fast, committed deployment.

VALUE & NEXT STEPS

What LPU Gains

This partnership delivers tangible, measurable value across sustainability, student satisfaction, and institutional prestige — with almost nothing required from your side.

Sustainability

Zero-emission mobility aligned with India's national EV push and green campus rankings.

Competitive Edge

First large North India campus with a managed e-scooter fleet — a genuine differentiator for prospective students.

Better Student Life

Less walking. More time on campus. Higher student satisfaction and engagement.

Minimal Ask from LPU

Elmo bears all CAPEX, ops & maintenance. LPU provides only a 40–80 sqm closed space for battery swaps and Electrical charging points.

Next Steps

01

Site Visit

Swap zone mapping with the LPU facilities team

02

Agree Pilot Scope & Model

Finalise fleet size, zones, and partnership model

03

Sign MoU · Fleet Live in 90 Days

Formalise the partnership and launch operations on campus
